

CYLERA PLATFORM TECHNOLOGY AND DEPLOYMENT

The Cylera platform is powered by patent-pending technologies developed for the unique requirements of the healthcare environment and devices.

PASSIVE & AGENTLESS DEPLOYMENT

Completely passive solution deployed via network. No active scanning or endpoint agents. Zero disruption to operations or devices.

DEEP VISIBILITY AND CLINICAL CONTEXT

Powered by artificial intelligence enhanced with granular understanding device protocols, behaviors and research.

COMPLETE MEDICAL DEVICE AND HIOT COVERAGE

Coverage for the entire healthcare system including medical devices, IoT, operational technology and IT infrastructure. System supports legacy devices and future device deployments.

ROBUST INTEGRATION & ORCHESTRATION

Cylera leverages your existing IT & security tools, sharing alerts, actions, threats and data with other platforms for incident response, IT operations, segmentation and other workflows.

CORE TO CLOUD LTD.
